

ppm DISSOLVED OXYGEN APPLICATIONS

- Municipal Waste Water
- Fish Farms

Are you looking for a ppm D.O. Analyzer with...

- A self cleaning sensor to reduce maintenance?
- An analyzer that gives fast, reliable, ppm Dissolved Oxygen readings?
- An easy to install membrane module to prevent air bubbles and creases?
- A sensor that lasts many years and helps eliminate sensor drift by using a self regenerative electrolyte?
- Galvanic technology for better calibration and absolute zero?

Look no further than IC CONTROLS

Model 855

Model 802

Swing Arm Assembly shown

The industrial Model 855 D.O. analyzer paired with the Model 802 D.O. sensor from IC Controls provides you with maximum flexibility, reliability and ease of use. Our model 802 sensor is extremely rugged, self cleaning and offers convenient pop-in membranes.

A FEW REASONS TO CHOOSE IC CONTROLS...

- **Products backed by 30 years of Industrial Water Analysis Experience.**
- **A history of providing products with proven performance and quality.**
- **Your ability to select from numerous options, enabling you to purchase tailor-made products for your specific applications.**
- **True benefits from purchasing quality products which, over the long run, pay for themselves.**
- **Our products offer accuracy, simple maintenance and are known for working well in tough applications.**

With all this behind our products, you can feel confident when purchasing from IC CONTROLS!
