

CHLORINE APPLICATIONS

- Drinking Water
- Well Water
- Community Pools

Are you looking for a Chlorine Analyzer with...

- Intuitive user friendly programs that “just seem to do what you expect”?
- Easy Maintenance?
- Ability to operate without a menu or manual?
- Self and sensor diagnostics?
- LCD displays ppm Chlorine, pH temperature, alarm set-points and calibration?

Look no further than IC CONTROLS

The chlorine systems provided by IC CONTROLS are mounted on a panel consisting of the analyzer, flow cell and sensor. The only installation required is to provide the plumbing to the inlet and from the outlet.

A FEW REASONS TO CHOOSE IC CONTROLS...

- **Products backed by 30 years of Industrial Water Analysis Experience.**
- **A history of providing products with proven performance and quality.**
- **Your ability to select from numerous options, enabling you to purchase tailor-made products for your specific applications.**
- **True benefits from purchasing quality products which, over the long run, pay for themselves.**
- **Our products offer accuracy, simple maintenance and are known for working well in tough applications.**

With all this behind our products, you can feel confident when purchasing from IC CONTROLS!
